**SIA Announces Scientific Advisory Board (SAB)
for its Worker Health Feasibility Study**

In its unwavering commitment to remain among the industries with the lowest rates of work related injuries and illnesses, the U.S. semiconductor industry continues to aggressively investigate and manage potential occupational health issues. Among the recent steps taken to maintain and advance this focus on safety involves the industry's creation of a Scientific Advisory Board (SAB). Consisting of an independent group of prominent scientists in the fields of medicine, epidemiology, industrial hygiene, and toxicology, the SAB will provide objective scientific and medical advice to the SIA's Worker Health Project committee as the U.S. semiconductor industry works to develop and conduct meaningful, scientifically valid, and attainable studies to review potential cancer health risks within the industry.

Scientific Advisory Board Bios Available Below:

[David L. Eaton, Ph.D.](#)

[Nurtan Alan Esmen, M.Sc., Ph.D.](#)

[Grace K. LeMasters, Ph.D.](#)

[Gary M. Marsh, M.S., Ph.D.](#)

[John \(Jack\) A. Moore, M.S., D.V.M.](#)

[Marc B. Schenker, M.D., MPH](#)

[Robert C. Spear, M.S., Ph.D.](#)
